Keeno Smith

Full-Stack Software Engineer & Web Developer

AI Application Development · Agentic AI · Cloud & DevOps · Product & UX

Full-Stack Software Engineer & Web Developer with a strong foundation in JavaScript, React, Node.js, backend development, database engineering, and modern web application architecture. Experienced in designing and building end-to-end software across frontend, backend, APIs, databases, and deployment, with an expanding specialization in AI application development, including LLM integration, Retrieval-Augmented Generation (RAG), prompt engineering, agentic AI, and AI-driven workflows.

My background combines formal software engineering and computer science education with hands-on product development, web design, and entrepreneurial experience, complemented by growing expertise in cloud infrastructure, DevOps, and CI/CD. This enables me to approach software development from both an engineering and product perspective, with a focus on building scalable applications and effective user experiences.

01 Education

- Generative AI Mini Bootcamp**

2026 · Stellenbosch University

Generative AI training focused on modern AI concepts, generative models, AI application development, and practical applications of emerging AI technologies.

- Full-Stack Software Engineering & Web Development Bootcamp**

2026 · Hyperion Development

Full-stack software engineering and web development training covering frontend, backend, databases, APIs, software architecture, and application deployment.

- BSc Computer Science**

2017 · University of South Africa

Computer Science degree studies covering core programming, software development, computer science, and related technical disciplines.

- National Senior Certificate**

2015 · Greenside High School

02 Certifications

AWS Skill Builder: skillsprofile.skillbuilder.aws/user/keenosmith
Credly: credly.com/users/keeno-smith

- Agent Architect**

2026 · Microsoft × Founderz

Architect-level training focused on designing scalable AI agent solutions using Microsoft Foundry, including agent architecture, prototyping, and production-oriented approaches to enterprise AI.

- AWS AI / ML Scholars Programme AI Practitioner
AWS AI Programmer Nanodegree**

2026 · AWS × Udacity

Project-based AI and machine learning programme covering generative AI, AWS AI services, responsible AI, prompt engineering, and practical AI application development, with advanced training in Python, PyTorch, neural networks, and transformer architectures.

- Generative AI for Software Engineers**

2025 · WeThinkCode_

Applied generative AI training for software engineers, covering the practical use of AI technologies and development workflows.

- Full-Stack Open**

2026 · University of Helsinki

Full-stack web development programme covering modern JavaScript, React, Node.js, REST APIs, databases, application architecture, testing, and deployment.

- IBM Enterprise Design Thinking Practitioner
IBM Agentic AI**

2026 · Umuzi · African Coding Network (ACN) · ITExperience

Professional development spanning enterprise design thinking, agentic AI, and technology-focused digital skills, combining IBM's design thinking methodology with practical exploration of AI agents and Umuzi's ITExperience programme.

03 Experience

- Co-Founder & Brand Strategist**

2023–2026 · Firstdaes Entertainment

Co-founded and helped lead an events business, overseeing brand strategy, market positioning, audience development, and promotional operations. Managed end-to-end marketing initiatives and campaigns, translating business objectives into customer-facing strategies and coordinating projects from initial concept through execution. Contributed to commercial planning, operational decision-making, and the development of the company's broader brand and growth strategy.

- Technical Contract Specialist**

2021–2024 · 3Play Media

Reviewed, transcribed, proofread, and edited technical documentation, training materials, and technology-focused content across enterprise software, cloud computing, networking, cybersecurity, software development, and emerging technologies. Worked with technically complex material requiring accuracy, terminology consistency, contextual understanding, and close attention to technical detail. Content covered technologies and subject matter associated with Cisco, Oracle, Palo Alto Networks, Unreal Engine, Deloitte, ThousandEyes, Salesforce, NVIDIA, and Apple.

- Independent Software Engineering & Web Development**

Project-Based · Freelance & Independent Development

Much of my software engineering and web development experience has been developed through freelance, independent, academic, and portfolio-driven projects. This work spans full-stack application development, frontend and backend engineering, REST APIs, database design, authentication, deployment, AI application development, and modern web architecture. Projects have provided hands-on experience taking applications from initial requirements and interface design through implementation, integration, testing, and deployment.

04 Projects

Portfolio: keenosmith.vercel.app/
GitHub: github.com/keenosmith-del

Software Engineering

Full-Stack Development
Frontend Development
Backend Development
API Development
Application Architecture
Component Architecture
State Management
CRUD & Data Management

AI & Application Development

AI Application Development
LLM Integration
Prompt Engineering
Retrieval-Augmented Generation
Agentic AI
AI-Driven Workflows

Databases & Data

MongoDB
Mongoose
PostgreSQL
Prisma ORM
Database Design
Relational Data Modelling

Development & Delivery

Authentication & Authorization
REST APIs
Third-Party API Integration
Testing & Debugging
Deployment
Git & Version Control
Responsive Web Development

- Full-Stack Productivity Platform**

Full-Stack Web Application · React · Node.js · Express · MongoDB · Mongoose

A full-stack productivity platform bringing tasks, projects, goals, reminders, notes, folders, calendar functionality, and user accounts into one cohesive application. Demonstrates full-stack architecture, REST API development, database design, authentication, protected routes, state management, CRUD operations, responsive interface design, and application deployment. Built with React, Vite, Node.js, Express, MongoDB, Mongoose, JWT authentication, and modern frontend tooling.

GitHub Repo: github.com/keenosmith-del/personal-productivity-desktop
Live URL: personal-productivity-desktop.vercel.app/

- AI Assistant Web Application**

AI Application Development · React · Node.js · Express · LLM APIs · RAG

An AI assistant exploring modern LLM integration, prompt engineering, Retrieval-Augmented Generation (RAG), and AI-driven application architecture. Demonstrates AI application development, API integration, conversational interfaces, context retrieval, prompt design, asynchronous data flows, and full-stack integration. Built with React, Node.js, Express, LLM APIs, and supporting AI development technologies.

GitHub Repo: github.com/keenosmith-del/ai-entity
Live URL: ai-entity-psi.vercel.app/

- Music API Web Application**

API & Backend · React · Vite · Node.js · Express · MongoDB · Mongoose

A full-stack music application combining music discovery, playback, queue management, and API-driven backend architecture. Demonstrates REST API development, backend architecture, database integration, asynchronous data handling, frontend state management, third-party API integration, and interactive application design. Built with React, Vite, Node.js, Express, MongoDB, and Mongoose.

GitHub Repo: github.com/keenosmith-del/music-api

- Enterprise Workspace**

SQL · React · Vite · Node.js · Express · PostgreSQL · Prisma

A structured enterprise workspace designed around modern frontend architecture, relational data management, and maintainable full-stack application design. Demonstrates enterprise application architecture, relational database modelling, ORM integration, REST API development, component architecture, data management, and scalable application structure. Built with React, Vite, Node.js, Express, PostgreSQL, and Prisma ORM.

05 Skills

GitHub: github.com/keenosmith-del
Codewars: codewars.com/users/keenosmith-del
LeetCode: leetcode.com/u/keenosmith/
freeCodeCamp: freecodecamp.org/keenosmith

Languages

JavaScript · Python · SQL · HTML · CSS

Frontend

React · Vite · React Router · Responsive Web Development · UI Architecture · Component Architecture

Backend

Node.js · Express · REST APIs · Authentication · JWT · Backend Architecture

Databases

MongoDB · Mongoose · PostgreSQL · Prisma · Database Design · Relational Data Modelling

AI / Machine Learning

LLM Integration · RAG · Prompt Engineering · Agentic AI · PyTorch · Neural Networks · Transformers

Cloud / DevOps

AWS · Git · GitHub · CI/CD · Docker · Kubernetes · Application Deployment

Engineering

Full-Stack Development · Software Architecture · API Design · State Management · Testing & Debugging · Version Control
